BioPharma Solutions

**Made for this**

## CAPABILITIES OVERVIEW

# Where your breakthroughs & our manufacturing get **products to patients faster.**

**At Simtra, we're made for this.** With 65+ years of sterile injectable manufacturing experience, we bring precision and transparency to every step of the production process, from product development through commercial fill and finish. As a premier independent CDMO, we partner with pharmaceutical and biotech companies to help realize their commercialization objectives for sterile injectables. Whether you are looking to launch your innovation globally, improve your formulation, or proactively mitigate risk, Simtra can help you deliver on your commitments to patients.

### Reliable Performance

- Award-winning facilities committed to delivering right the first time, on time and in-full
- Robust quality systems
- Audited by more than 19 regulatory agencies globally
- Products approved for market in more than 120 countries worldwide

### Trusted Expertise

- Tenured, experienced, and highly trained staff
- Scientific expertise from product and process development all the way to commercial production
- Partner to more than half of the top twenty pharma companies
- Valued customer model with single point of contact enabling direct access to experts on the bench and on the line

### Future-Focused Capabilities

- Continuous investment in premium systems to support operations
- Ongoing capacity expansions to increase manufacturing footprint and diversify platform offerings
- Development Services co-located onsite to support product development and process optimization
- Adherence to Environmental, Social, and Governance (ESG) principles

## Our broad portfolio of options grows with our customers

We have a deep focus in sterile injectables, manufacturing nearly **200 million units annually**, with our service offerings continually evolving alongside our partners to support their patients' needs.

## Delivery Platforms

### Prefilled Syringes

### Diluent Syringes

### Liquid Vials

### Lyophilized Vials

## Product Types:

- Cytotoxics
- Antibody Drug Conjugates (ADCs)
- Highly Potent Compounds
- Biologics
- Small Molecules
- Vaccines
- Diluents

## Global capabilities supporting standard and complex sterile injectable products

Our 1,600+ employees across manufacturing & engineering, quality control, commercial, and supporting roles share a commitment — **to make what matters.**

- ✓ Dedicated clinical through commercial production with integrated technologies and services
- ✓ Development Services co-located onsite to support product development, clinical and commercial production
- ✓ Meets FDA, JP and EU regulatory standards
